Ethan Townsend

Software Engineer | Full Stack Developer

Salt Lake City, UT | snxethan@gmail.com | in/snxethan | ethantownsend.dev

ABOUT ME

Full-Stack engineer skilled in React/TypeScript product surfaces, backend APIs, Java, and agentic AI systems. Recent work spans HIPAA-compliant telehealth infrastructure and production workflows for customer clients. I enjoy backend development and creating efficient solutions to hard problems while cultivating a diligent user experience.

SKILLS

Programming Languages	Java | TypeScript | Next.JS | JavaScript | Python | C# | .NET | C++
Frameworks	React | Next.js | Flutter | Blazor
Databases	MongoDB | Neo4j | SQL Server (SSMS) | Supabase
Durable Skills	Docker | Git/GitHub | Postman | AWS | Kafka | Nginx | Prometheus | Claude | Codex

INDUSTRY EXPERIENCE

PocketRN

Full-Stack Software Engineer — **May 2026—Present**

- Built React/TypeScript features end-to-end across a telehealth platform handling encrypted patient records, implementing access controls and data-handling paths for HIPAA-compliant health data.

Soar.com

Artificial Intelligence Software Engineer — **June 2026—Present**

- Built and deployed custom agentic AI workflows across multiple customer client projects, including a custom agentic email-scorer system deployed for the public; collaborated across teams on larger multi-engineer deliveries.

Cloud Range Cybersecurity

Quality Assurance Software Engineer — **March 2026—June 2026**

- Triaged high-priority defects and built automated test coverage for a cybersecurity simulation platform, then ran a company-wide audit that identified vulnerabilities across internal environments and staff security practices.

TrueMark

Backend Software Developer Team Lead — **January 2026—March 2026**

- Supported and led a custom .NET modernization project by using AWS Transform and Kiro to analyze legacy application code and dependencies, migrate them to modern .NET versions, and validate upgraded builds, ensuring successful compilation and functional compatibility during the transition for customer clients.

PROJECTS

Portfoli-YOU *(portfoliyou.snxethan.dev)*

Personal Portfolio Website Creator Application — **August 2025—January 2026**

- Developed a desktop portfolio builder featuring drag-and-drop website creation and deployment using React and TypeScript. Architected the system to support live preview, static export, and Vercel-based deployment workflows for end-to-end portfolio publishing.

CERTIFICATIONS

IT Certifications: Cybersecurity (2023) | Network Security (2023) | Computational Thinking (2022) | Arizona Technical Skills Certified (2021)

EDUCATION

Neumont University

Bachelor of Science in Computer Science — **October 2023—September 2026**

- Graduating with honors, summa cum laude (4.0 GPA)
- United Student Government (USG) Vice President | Student Ambassador | Student Coach, Peer Tutor
